EDUCATION

Texas A&M University

M.S. Computer Science

B.S. Computer Science and B.S. Statistics, Summa Cum Laude · GPA 3.92/4.00

College Station, TX

Expected 2028

May 2026

EXPERIENCE

Graduate Assistant Research, Computational Genomics

Ioerger Lab, Texas A&M University

- Analyze Mycobacterium tuberculosis drug-response and genome-evolution experiments with statistical models.
- Build Python and Slurm workflows for sequence preparation, Bayesian dN/dS estimation with GenomegaMap, and PAML/codeml checks.
- Compare model results, apply multiple-testing correction, and prepare figures and tables for the lab.

Jun 2026 - present

Software Engineering Capstone, Amazon-sponsored

Texas A&M University · team of three

- Built a breach-intelligence platform spanning ingestion, AI-assisted processing, search, graph relationships, and analyst views.
- Connected AWS S3, MongoDB, Elasticsearch, Redis, and Neptune, and delivered Streamlit and Kibana views.

Aug 2025 - Dec 2025

Teaching Assistant, CS 111

Texas A&M University

- Supported students learning Java and object-oriented programming through labs, debugging help, and weekly assignment review.

Spring 2026

AI Engineering Intern

Videomagic · remote

- Evaluated PyTorch and Hugging Face workflows for AI-generated video detection, including frame-level failure modes.
- Built authenticated APIs with Feathers.js, MySQL, Knex, and Auth0. Shipped features associated with a 15% lift in engagement.

May 2024 - Aug 2024

Undergraduate Researcher

UrbanResilience.AI Lab, Texas A&M University

- Built Python workflows that join air-quality sensor APIs with wildfire data for later analysis.

Jan 2025 - May 2025

SELECTED SOFTWARE

harsh.bet. A TB gene browser, a paper reader, study tools, and everyday apps for tasks, habits, notes, meals, training, focus, degree planning, and used-car search.

SKILLS

Languages. Python, R, SQL, TypeScript, JavaScript, Java, C++.

Statistics and genomics. pandas, NumPy, SciPy, statsmodels, hypothesis testing, FDR correction, GenomegaMap, PAML/codeml, Slurm.

Software. React, FastAPI, PostgreSQL, MongoDB, Elasticsearch, AWS, Git, GitHub Actions.
